

USP KERAFOL®

Unique Selling Proposition Thermal Management

What makes us successful?

- More than 30 years of experience in the field of “Thermal Interface Materials” and related polymers and fillers
- Large portfolio, with many unique and innovative Materials such as the new KERAMOLD® and the KERABSORB series or new Gap Filler / potting materials
- Short reaction times thanks to production in central Europe (Made in Germany)
- Fast responding time in terms of customer support or sampling
- Various service options like consulting and prototyping in dispensing and injection molding technologies
- Highest standard in terms of products quality and reliability including IATF 16949 certification
- Many years of field experience in plenty of different applications including automotive
- Focus on long-term cooperation, very high CLV (Customer Lifetime value) rate
