

# USP KERAFOL®

Unique Selling Proposition Thermal Management

## What makes us successful?

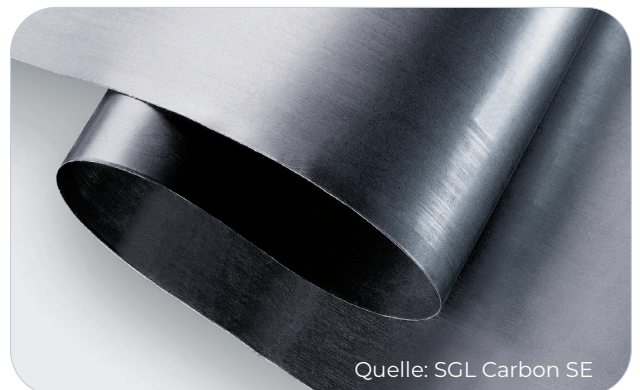

- KERAFOL® uses exclusively natural graphite
- Low energy costs as no graphitization step is required
- Very high mechanical stability combined with low compressibility
- High corrosion and chemical resistance
- High sustainability aspect, as the material can be reprocessed into powder again
- Wide range of variants due to different thicknesses, densities and formats, such as die-cuts, sheets, material on roll
- Additional adhesive coating is possible on one or both sides
- 100% Made in Germany
